 WEB SITE: WWW.AIRCRAFTDYNAMICS.COM E-MAIL: SALES@AIRCRAFTDYNAMICS.COM

Over the past 47 years, Aircraft Dynamics Corporation has been solving problems and creating solutions for those who make our lives better and safer. We take pride in designing and producing quality innovative products to assist Fire and Rescue, Military, Utilities and others all over the world. Many of our products and services are a direct result of contact from you. To help continue that trend, if you ever have any questions regarding our products or have a product idea or problem you would like us to help you with, please contact us. When you contact us, you will not be lost in an endless circle of voice mails but, instead, you will be able to talk with and have direct access to anyone within our company. We believe in an "open door" policy and look forward to your call.

Designing and producing high-quality products is not our only goal. Equally important is our Customer Service, which we believe is second to none. We have been fortunate through the years to develop quality products that are durable, reliable and have "stood the test of time." However, if a problem should ever arise regarding a product or service, we will not turn our backs and you have our word that we will correct any problem or minimize any inconvenience. We will be there for you before, during and after the completion of your order.

As you look through our catalog, you will see a variety of specialized products. Unfortunately, written materials are static in time and may not always reflect new or improved items. Therefore, we would also like to point out that all our products, and newly developed additions, can be viewed and purchased on our web site —

www.AircraftDynamics.com (Fire and Rescue Division)

Sincerely,

*All Employees,
 Aircraft Dynamics Corporation*

LED SCENE LIGHTING

M1 Green Hornet

*Folds for
Easy Storage*

M2 Green Hornet

TELESCOPING QUAD-POD SYSTEM

Traditional systems use a tripod (three legged). However, research indicates that these systems have been proven to be unstable in many circumstances especially when encountering uneven terrain. Further, most telescoping systems are hard to raise and do not provide enough height to avoid a blinding effect that can be created by LED lights. The M1 addresses these problems. The M1 Green Hornet can reach a height of 10.5 ft. and it uses a quad-pod safety stand that has easy to use independent telescopic legs that also provide three height adjustments (pull pin or kick release levers). Each leg is heavy-duty powder coated metal with non-skid rubber feet. Setup takes only seconds!

ROBOPAK KITS

The M1 and M2 Green Hornet Scene Lights have been designed for those who want a versatile, rugged and "take-it-anywhere" powerful LED Scene/Work Lighting System. The M1 or M2 can be powered by any independent 12v or 24v power source. When powered by Variable Voltage Robopaks, you achieve maximum portability with extended hours of run time.

XL 9280

Cat. No. 3025

XL 9208 Robopak, 7005 M1 Scene Light, Adapter, 4256 DC Responder Vehicle Charger. Run time: 3 hrs. high (Dual Lights), 6 hrs. low (Single Light)

Cat. No. 3026

XL 9208 Robopak, 7005 M1 Scene Light, Adapter, 4329 Shoreline AC Charger. Run time: 3 hrs. high (Dual Lights), 6 hrs. low (Single Light)

The M1 and M2 Green Hornet LED Scene Lights are powerful, portable, rugged and versatile systems designed for fire and rescue, military, utility, construction and other applications. Years of market research and design has produced a proprietary blend of requested key features not available from existing portable LED and other conventional lighting systems. The M1 comes with an attached Telescoping Quad-Pod Stand (see below). Already have a safety type stand? The M2 comes with an attached connector that allows this light to attach to existing safety sign stands.

LED LIGHTHEADS

The M1 and M2 provide two round 7" Military grade lights with high output LEDs that can be operated independently, producing a powerful high or low feature. Each light can rotate independently 360° clockwise or counterclockwise and 180° horizontally, allowing users to cover needed areas unavailable by other lighting systems that only provide "front" type projections. These lights produce a unique proprietary rectangular spot pattern with a flood outlay covering an extremely large area. The Green Hornet series also features an independent amber center warning LED light that has 11 flash patterns that can be seen for miles.

- High output LEDs produce an extremely bright, crisp white light
- Solid-state electronics with instant on and off
- Long life LEDs: 20,000 hrs. vs. 400 for HID and other lighting
- Very rugged — shock, vibration and weather proof
- Impact resistant polycarbonate lens
- Corrosion resistant anodized aluminum housings
- Metallized reflector produces unique intense spot/flood pattern
- Internal concealed cord
- Operating temperature range: -50C to 70C
- Power source: 12v (24v also available)
- Amp draw high (both lights on): Approx. 8 amps @ 12v
- Amp draw low (single light on): Approx. 4 amps @ 12v
- Complies with military spec for EMI

***Cones alone are not enough!
Maximize the safety of your workers and
surrounding areas with the Robolight ConeLights.***

Robolight ConeLights are small, versatile and more effective than using cones by themselves. Providing a safer alternative, ConeLights can be easily placed over your cones. ConeLights utilize durable long lasting weather resistant LEDs. Lights have strong magnetic bottoms which securely attach to rust resistant powder coated orange metal plates that can be used with all cone sizes. Save thousands of dollars with long life LEDs.

- More effective and safer than standard road flares
- Great and effective "green" alternative
- Eliminate fire hazards associated with standard flares
- Takes only seconds to set up and deploy
- Lights can be seen for miles
- Lamp: Shock Resistant LED
- Batteries: 4 AA
- LED Bulb Life: 10,000 hrs.
- Battery Burn Time: 50 + hrs. (blinking)

LZ LANDING & WARNING LIGHTS

Robolight LED FlareLight Kit is the ultimate in LZ (landing zone) evacuations, traffic safety, control and warnings. FlareLights are small, extremely versatile and more effective and safer than traditional road flares. Providing a safe alternative with a wide range of applications, FlareLights can be placed anywhere. They have strong magnetic bottoms and they use long-lasting, rugged LED technology. Place these anywhere! Setting up a Landing Zone Evacuation only takes seconds. For LZ landing applications simply attach the LED lights magnetically to the provided metal weights and place where needed.

Cat. No. 7029 Kit

Contains four red and one amber FlareLights and five separate metal support plates to secure lights to any surface. Batteries are also included. The LED FlareLight Kit is housed in a small heavy duty plastic crushproof and waterproof case.

ROBOPAKS®

Tired of running out of power at critical times? Frustrated with constantly purchasing different types of batteries that quickly fail and need replaced?

Would you like a single battery system that will run all your DC tools, lights and equipment with more reliability and extreme run times?

Variable Voltage Advantage

With advanced battery technology, a single Robopak can provide alternative voltage needs, powering an infinite number of different brand tools, lights and equipment. All you need is a single Robopak and you can stop the aggravation of purchasing different types of batteries!

Extreme Run Times

Power to finish the job! Robopaks have super amp/hr. capacities, providing up to 30 times (depending on tool) longer run times than standard cordless battery power. You will not be left stranded in the middle of a job.

Lightweight, Easy to Transport

Lightweight and easy to transport, Robopaks are heavy-duty all weather systems that provide reliable DC power. Robopaks are extremely portable - take power where you need it you are not tied to a truck or generator!

Charge Friendly

Charge friendly, Robopaks do not have memory issues, allowing recharge at any point of discharge and they can be left on charge when not in use. So they are ready when you are!

Clean, Safe, Portable Power

If you want clean, safe power that is reliable — no leaking hydraulic or gas lines and no GFCI requirements — Robopaks provide the ultimate in portable power that will save you many inconveniences and will save you money!

Robopaks Will Save You Money

Stop purchasing all those different types of batteries and wasting your time! All you need is one battery! A single Robopak will power all your tools, lights and equipment. And, these systems are so reliable and durable they will outlast all other types of batteries. Robopaks have "long-life" features.

Power Hundreds of Tools

Tri-Voltage Robopak!

Highly requested Robopak can power tools, lights and equipment that require 36v, 24v-28v, or 12v-14.4v to operate. The XL 36v-12v can be taken where you need it. With the proprietary voltage "Plug-and-Go-System," set up takes only seconds. Simply plug your tool into the Variable Voltage Power Receptacle and you automatically have the proper voltage required and the power to finish the job! Charge friendly, the XL 36v-12v can be recharged at any point of discharge and can be left on charge when not in use. Additional features include a refurbish program that will save you thousands of dollars.
